***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-2, 9, 11, 13, 20, 22, 24-25, 32, 34, 36, 43, 45 and 47 drawn to a method of folding a protective cover article- changing pad, classified in class 493, subclass 405.
  - II. Claims 3-8, 10, 12, 14-19, 21, 23, 26-31, 33, 35, 37-42, 44, 46 and 48-57 drawn to a folded article- changing pad, classified in class 206.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed in claims 3-8, 14-19, 26-31, 37-42, 48-57 can be made by another and materially different process such as forming number of longitudinally extending fold in the same direction, thereafter forming transversely extending folds in an accordion-like manner. Further, in the instant case the process as claimed in claim 10, 12, 21, 23, 33, 35, 44, 46 can be used to make other and materially different product such as folded maps or labels or tissues.

It is recognized that claims 3-8, 10, 12, 14-19, 21, 23, 26-31, 33, 35, 37-42, 44, 46 and 48-57 are **product-by-process claims**. However, a product defined by the process by which it can be made is still a product claim and can be restricted from the process if the examiner can demonstrate that the criteria for distinction between the

Art Unit: 3721

product and the process, as discussed above, is met. (See *In re Bridgeford*, 149 USPQ 55 (CCPA 1966)). Defining the product in terms of a process by which it is made is merely a permissible alternative technique that applicant may use to define the product. (See MPEP 806.05(f)).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Further, this application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1; the embodiment of figures 7,8 and 11.

Species 2; the embodiment of figures 9,10 and 12.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. A telephone call was made to Michael Bendel on 5/31/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hemant M. Desai whose telephone number is (571) 272-4458. The examiner can normally be reached on 7:00 AM-5:30 PM, Mon-Thurs..
